SHOW TABLE OF CONTENTS

According to the Ontario Agency for Health Protection and Promotion Act, 2007, the Ontario Agency for Health Protection and Promotion was created, which is now referred to as Public Health Ontario. The timing is interesting, given that its creation aligns with the 2005 Quarantine Act, which itself is the result of the 3rd Edition of the International Health Regulations from the World Health Organization.

For some background information, here is more on the WHO-IHR, the Quarantine Act, and Ontario's own Health Act. It's worth also addressing PHAC, and its self-proclaimed advisor, Robert Steiner, who also sits on OST. These are not independent events, but are directly linked.

This entity (referred to as Public Health Ontario, or PHO), is set up and structured as a corporation. It's a Crown Corporation, mostly autonomous from the Government.

Powers

7 (1) Except as limited by this Act, the Corporation has the ***capacity, rights and powers of a natural***

person for carrying out its objects. 2007, c. 10, Sched. K, s. 7 (1).

This group is to have the same rights and powers as an actual person which is not weird at all. The Act also indemnifies any employees or officers or directors from any liability, as long as they claim to be acting in good faith.

IMMUNITY AND UNPAID JUDGMENTS
No actions or proceedings against Crown
26 No ***proceeding for damages or otherwise shall be commenced*** against the Crown, the Minister or any person employed by the Crown with respect to any act done or omitted to be done or any decision of the Corporation, a director or officer of the Corporation, a member of a standing committee or a person employed by the Corporation. 2007, c. 10, Sched. K, s. 26.

Immunity from civil action
27 (1) ***No proceeding for damages or otherwise shall be commenced*** against the Minister, a director or officer of the Corporation, a member of a standing committee, or any person employed by the Crown or the Corporation, with respect to any

act done or omitted to be done or any decision under this Act ***that is done in good faith in the execution or intended execution of a power or duty under this Act***. 2007, c. 10, Sched. K, s. 27 (1); 2011, c. 1, Sched. 6, s. 7 (1).

Nothing shows that people take responsibility for their actions quite like giving them a pass for the possible consequences. There are limited provisions for taking action against the Crown itself, but not members involved.

Anyhow, that Act specifies that this corporation is to act as an autonomous and mostly independent group from the Government. This would be similar to Alberta Health Services operates.

Now, PHO is structured as a corporation, and is designed to be an arm's length operation from the Crown. Okay. But looking at who runs it, some familiar faces appear.

Dr. Brian Schwartz
Vice President

Cathy Campos
Chief Financial Officer

Dr. Vanessa Allen
Chief, Microbiology and Laboratory Science

Dr. Jessica Hopkins
Chief Health Protection and Emergency Preparedness Officer

Eileen Clarke
Senior Counsel

Antonia Maric
Operations Director, Quality, Regulatory Affairs and Customer Service

Louis Litsas
Operations Director, Provincial Testing, Bacteriology, Environmental and Genomics Core

Dr. Samir Patel
Deputy Chief, Microbiology and Laboratory Science

- Brian Schwartz is Vice President of PHO
- Vanessa Allen is Chief, Microbiology and Laboratory Science at PHO
- Jessica Hopkins, Chief Health Protection and Emergency Preparedness Officer at PHO
- Samir Patel, Deputy Chief, Microbiology and Laboratory Science at PHO

Some interesting names in the Leadership of Public Health Ontario. Why should we care about who any of them are? There's a really simple reason.

Brian Schwartz

MD, MScCH

Co-Chair
Vice-President, Public Health Ontario
Associate Professor, Department of Family and Community Medicine and Dalla La
University of Toronto

Brian Schwartz provides executive leadership for PHO's public health science and populat
including environmental and occupational health, health promotion, chronic disease and ir
research and ethics services. Previous portfolios include health protection, emergency pre
communicable diseases and infection prevention and control. Dr. Schwartz served as Scie
Emergency Management Branch of the Ministry of Heath and Long Term Care from 2004
Public Health Ontario's inaugural Chief of Emergency Management Support. He acted as V

Vanessa Allen

MD, MPH

Assistant Professor, Department of Laboratory Medicine and Pa
Chief, Microbiology and Laboratory Science, Public Health Ontar
Medical Director, Provincial COVID-19 Diagnostic Network, Onta
Clinical Consultant, Infectious Diseases, Sunnybrook Health Scie

Vanessa Allen is a medical microbiologist and clinical infectious disease spe
Microbiology and Laboratory Science at Public Health Ontario since 2013, ar
Provincial COVID-19 Diagnostics Network at Ontario Health. She attends as
Specialist at Sunnybrook Health Sciences Centre and is an Assistant Profess

Jessica Hopkins

MD, MHSc, CCFP, FRCPC, FCFP

Deputy Chief, Health Protection, Public Health Ontario
Assistant Professor (part-time), Department of Health Research Methods, Eviden
University
Adjunct Lecturer, Dalla Lana School of Public Health, University of Toronto

Dr. Jessica Hopkins is the Deputy Chief, Health Protection, Medical and System Support a
Ontario (PHO) and provides leadership to PHO's infection prevention and control Region
Research, Evaluation and CQI Support Teams, and physicians in the areas of communicab
emergency preparedness and response, and infection prevention and control.

Dr. Hopkins has 10 years of experience in local public health and previously worked as the
Health for Peel Region, and as an Associate Medical Officer of Health In Hamilton and Nia
works as a family doctor and is an Assistant Professor (part-time) with the Department o

Samir Patel

PhD, FCCM, (D) ABMM

Deputy Chief, Microbiology, Public Health Ontario
Clinical Microbiologist, Public Health Ontario
Associate Professor, Department of Laboratory Medicine and Pathobio

Dr. Samir Patel is a clinical microbiologist and deputy chief of microbilogy at Publ
provides clinical expertise in various areas, including bacterial vector borne diseas
testing, and hospital associated infections. Dr. Patel is also an associate professor
Laboratory Medicine and Pathobiology at the University of Toronto. Dr Patel is a r
and national and international working groups including Lyme disease diagnostic

In case it wasn't clear, here is the point: several high ranking members of Public Health Ontario are also members of the Ontario Science Table. Keep in mind, the OST presents itself as neutral and independent expert advice. At the same time, officials from a Crown Corporation in that same Province are part of their organization.

Considering that PHO functions as an extension of the World Health Organization, and implements their dictates, what kind of perspectives will these people bring to OST? Will they

simply implement the same ideas, cloaked as “science”, or will they offer radically different policies? So far, it seems to be the former.

When these people speak at OST events and gatherings, are they talking as scientists working independently for the health of Ontarians overall? Or, are they acting in the capacity of Public Health Ontario representatives? Unless the OST is an extension of PHO, there are bound to be conflicts of interest.

It’s a bit like Theresa Tam, who has a page as the Public Health Officer of Canada, but who also as a page for a World Health Organization Advisory Committee. These people even use the same photographs.

On a related note: Deputy Prime Minister, and Finance Minister, Chrystia Freeland is also a Trustee at the World Economic Forum. Other prominent politicians are also involved with that organization.

PRESS RELEASE
SEPTEMBER 28, 2020
Mississauga, On (September 28, 2020) – When the pandemic hit, Max Cucchiella and his wife, Sarah Veinot, along with their family, gathered around the kitchen table in their Port Credit home to help their community. They started making non-medical masks with a clear vinyl insert in the centre, so that those who are deaf or

The mess that is the covered before, and more is likely to be added. Far from being independent, OST is rotten to the core with conflicts of interests, and members who have side ventures.

Do the OST and Trillium Health Partners really think that mask mandates are in the public's best interest? Or did a $5 million donation from a mask manufacturer change their minds? Does Michael Warner's side business influence his support for lockdowns? What About Kumar Murty's business interests? Or Kwame McKenzie's 2017 Ontario UBI project?

Final thoughts to readers in Ontario: do you have any clue who is really running health care in Ontario? Do you know who is actually running the Province? Who's behind the martial law masked as medical necessity? Think Doug Ford or Christine Elliott are anything but puppets?

Well researched! Good work exposing the unfruitful works of darkness.

Twisted Wizard

Are you seeing the correlation between corporate body and natural person? The government is a corporation and any 'person' in Canada is a body corporate as stated in the municipality act of Ontario section 4, now section 9 states that the municipality is considered a natural person with all the rights that come with that. So they consider us as corporate body for the purpose of administering their laws and statutes. Are you a natural person or a corporate body? Well how does the government label you as a corporate body and get away with it you ask? It's your birth certificate, yes your birth certificate is a bank note used with a red number called a CUSIP number on it to track your entitie on the stock market, which is used to borrow money from the IMF world bank, why do you think we have a deficit? Government borrows money using us a collateral and taxes us to pay it back using your registered SIN number which in section 13 of the

form you fill out for it states that it is voluntary to do, but you have to have one to work, see the trap for what it is, the corrupt corporation of Canada is not a democratic country, it is a defacto service corporation hell bent on rapeing you for everything and your rights as a natural person.
